

Akshat Khosla

Hyderabad, India

+91 9910405417 • khoslaakshat2002@gmail.com • LinkedIn, GitHub

Backend and Applied AI Engineer with 2+ years shipping production systems at enterprise scale (.NET, Python, Azure). Delivered 3 end-to-end LLM platforms using RAG, LLM-as-judge, MCP, and distributed tracing on FastAPI and ChromaDB, including a production AI PR Copilot built with Claude Opus 4.6 and Claude Code. Published ML researcher (Complex & Intelligent Systems, 2025). Targeting Software Engineer I/II and Applied AI/ML Engineer roles.

Core Competencies

- **Backend Engineering:** Python (FastAPI, Flask, SQLAlchemy, Pydantic, asyncio), C# (.NET / ASP.NET Core), REST APIs, microservices, system design
- **Applied AI / LLM Engineering:** RAG, LLM Agents, LLM-as-Judge, MCP (Model Context Protocol), Anthropic API, Vector Databases, SentenceTransformers, Prompt Engineering, using Claude Code for agentic development workflows
- **Full-Stack Development:** TypeScript, JavaScript, React, Angular
- **Data & Infrastructure:** PostgreSQL, SQL Server, MongoDB, SQLite, ChromaDB, Redis, Alembic, query optimization
- **Cloud & DevOps:** Microsoft Azure, Docker, GitHub Actions, CI/CD, Git, distributed tracing, event-driven and domain-driven architecture

Professional Experience

- **GEP** **Hyderabad, India**
Software Engineer *Jul 2024-Present*
 - Shipped an AI-powered PR Copilot (Claude Opus 4.6, built with Claude Code) into production, auto-generating test cases and readiness reports from PR descriptions, reducing per-PR review time by ~30% across 8+ engineers and measurably improving defect catch rate
 - Architected a scalable configuration framework across 3+ product modules, cutting feature delivery time by 40% and enabling non-technical self-service workflow customization for enterprise clients
 - Led an Angular 8 to 20 migration across 2 production repos with 150+ UI component plugins impacting 10+ website pages, completing all 3 sprints on schedule; co-authored the migration POC with the Platform team and cross-supported additional engineering teams to accelerate org-wide modernization
 - Led end-to-end delivery of a configurable Excel-based data ingestion system, replacing 3 rigid templates and cutting client onboarding time by 60% for new enterprise data types
- **Thapar University** **Patiala, India**
Research Assistant *Jan 2024-Jul 2024*
 - Designed a Transformer-augmented Deep Knowledge Tracing model on a 500K+ student interaction dataset, achieving +6.8% AUC and +5.3% F1 over LSTM baselines
 - Research published in Complex & Intelligent Systems (2025)
- **GEP** **Mumbai, India**
Technology Intern *May 2023-Jul 2023*
 - Engineered a REST API automation script for vulnerability-alert setup across 50+ GitHub repositories, compressing a multi-day manual security task to under 30 minutes (~96% time reduction) and strengthening org-wide compliance posture
- **Cadence Design Systems** **Noida, India**
Software Intern *May 2022-Jul 2022*
 - Automated IC waveform data curation and EDA analysis in Python across 100+ simulation datasets, replacing a fully manual evaluation workflow and reducing simulation review time by 50%

Selected Projects

- *LLM Evaluation Platform* 2026
Multi-judge LLM evaluation platform (LLM-as-judge, faithfulness, relevance, coherence) with `asyncio.Semaphore` concurrency supporting 100+ concurrent evaluations; provider-agnostic across Google Gemini and Ollama. FastAPI + PostgreSQL JSONB backend with distributed tracing; React + TypeScript dashboard with CI/CD via GitHub Actions + Docker. [GitHub](#)
- *MemoryOS: Persistent Memory Layer for LLMs* 2026
Three-tier memory architecture (in-process dict, ChromaDB vector store, SQLite) enabling persistent cross-session recall with sub-100ms retrieval. Shipped an MCP server (JSON-RPC / stdio) compatible with Claude Desktop and Cursor, exposing 6 memory tools backed by a spaCy NER + regex pipeline. [GitHub](#)
- *DocMind: Document Q&A Agent* 2025
Production RAG + LLM agent web app ingesting PDF/DOCX/TXT up to 200 pages, embedding with SentenceTransformers and returning source-attributed answers via a multi-step agentic tool-use loop (Flask, Claude API, ChromaDB). [GitHub](#)

Education

- **Thapar University** **Patiala, India**
B.E. in Computer Engineering 2020-2024
CGPA: 8.7 / 10

Languages

- English (native), Hindi (native).
